

Floruvi tower farm, Bengaluru

Feasibility brief · version 1 · 29 September 2026. Built from 16 research agents and one modelling agent (583 sources). Two independent reviewers are checking these numbers now; version 2 will carry their fixes.

The answer

600 towers now: not affordable. They cost about ₹1.49 crore to build. You have ₹20 lakh.

200 → 6,000 towers in 6 months: not possible. 6,000 towers need about ₹12.8 crore, 11,400 m² under cover (you own about 4,047 m²), about 82 workers and 19 water tankers a day. Buyers would take only about 5% of the harvest at a good price.

A farm that sells before it grows can work. With your costs, profit starts at about 125 towers and reaches about ₹51,884 a month at 200 towers (₹68,268 per 40 days).

No tower profit by December 2026. Microgreens and trading greens from partner farms can bring first cash in 2–3 weeks.

Key numbers (base case)

Metric	Value
Money to build 200 / 600 / 6,000 towers	₹50.9 lakh / ₹1.49 crore / ₹12.8 crore
What ₹20 lakh builds, keeping a 6-month reserve	about 16 towers (full site) or 30 (lean site)
Profit a month with your costs, 200 / 600 towers	+₹51,884 / +₹1,76,928
Profit per 40 days with your costs, 200 / 600 towers	+₹68,268 / +₹2,32,800
Profit a month with research costs, 200 / 600 towers	−₹1,29,460 / −₹2,90,158
Break-even with your costs	about 125 towers (about 180 towers with your ₹40,000 monthly payment)
What buyers take from a new seller at a good price	95 kg a week by month 3; 400 kg a week by month 12
Best crops (per tower per month)	arugula ₹1,246 · Lollo Rosso ₹845 · mini romaine ₹715 · green oakleaf ₹679
First cash	trading greens about 14 days · microgreens about 19 days · towers about 65 days

Your inputs used

Bengaluru, Karnataka. Owned land 60 + 40 cents (about 4,047 m²), no rent. Tanker water (no borewell). Your monthly costs: night guard ₹10,000, helpers and packers ₹40,000, water ₹10,000, power ₹10,000, resident caretaker ₹15,000; repairs, trained grower, accounting, insurance and marketing ₹0. Capital ₹20 lakh. ₹40,000 a month to pay until August 2027. Grower experience: small trial.

How to read the numbers. Profit = cash profit (sales minus all running costs) before loan payments, depreciation and tax. Base = the most likely case. “Your costs” = your figures plus about ₹12,000 a month of small items you did not list (pest control, CCTV SIM, backup fuel). “Research costs” = what the research found for Bengaluru in 2026. Prices are Bengaluru market prices on 29 September 2026, not Floruvi list prices.

Scorecard: will this work?

Why it can work

Metric	Value	Source
Top crops earn money per tower	Arugula ₹1,246, Lollo Rosso ₹845 a month after seeds, packs, delivery and waste	Model, Hyperpure prices
With your costs, towers make a profit	From about 125 towers; 200 towers +₹51,884 a month	Model
Mild climate	November–February is ideal; normal highs 26.9–34.1 °C; no chiller needed in year 1	IMD normals 1991–2020
No land rent	Your owned 1 acre fits about 2,100 towers (about 1.9 m² each)	Owner; tower research
Real demand	A new seller can reach about 400 kg a week at good prices by month 12 (about 40 business accounts)	Demand research
Hydroponic premium	Hyperpure hydroponic lettuce ₹264/kg against field lettuce ₹140/kg	Hyperpure, 29 Sep 2026
Low input cost	About ₹3.6 per lettuce plant per 40 days (seed, media, nutrients, pest control)	Supplier prices
Fast side-line cash	Microgreens sell at ₹1,600–2,500/kg in shops; break-even about ₹700/kg; first sales about day 15	BigBasket; model
Cheap long-term loans	AIF: about 6% after 3% subvention, up to ₹2 crore, up to 2 years before repayments, no collateral (CGTMSE)	AIF guidelines
Sales channels already built	Floruvi site: 85 crops, boxes, B2B enquiries, export pages	Floruvi repository

Why it may not work

Metric	Value	Source
Capital gap	200 towers ₹50.9 lakh; 600 ₹1.49 crore; 6,000 ₹12.8 crore. You have ₹20 lakh	Model
Research costs lose money at every size	200 towers –₹1,29,460; 600 towers –₹2,90,158 a month	Model
Buyers are the limit	600 towers harvest about 640 kg a week; buyers take about 400 kg at good prices by month 12. At 6,000 towers only 5% sells well	Demand research
Loan payments exceed profit	EMI ₹67,330 against ₹51,884 profit (200 towers); ₹2,30,539 against ₹1,76,928 (600)	Model; 6% over 6 years
Small heads in crowded towers	80–100 g a head; 31% lighter than flat systems; bottom rows 43% lighter	Touliatos 2016; lettuce research
Early crop losses	20–35% in the first cycles, which meet the October–November monsoon	Climate and lettuce research
Heat and root rot	March–May lettuce –40%; tanks 26–31 °C; no approved fungicide for root rot	IMD; Univ. of Kentucky
Water	No borewell. About 1.15 m³ of tanker water per tower a month; RO wastes about half; Feb–May loads cost ₹2,000–2,850	Water research
Power	Farm feeders give about 7 hours a day; roots dry in 30–60 minutes when pumps stop	KERC tariff order 2025
Cheap, strong competitors	BigBasket: 24 hydroponic lettuces at ₹47–85 a head. Deep Rooted (Bengaluru) lost ₹52 crore and shut in March 2025	Price and demand research

How to make it a successful business

Action	Effect	When
Sell before you grow. Sign weekly orders; add towers only after 4 weeks at 70% or more sold at good prices	At 600 towers, selling everything at good prices adds +₹89,106 a month	Now
Raise your average price 20% (more Floruvi boxes and chefs, less bulk)	+₹40,955 a month at 200 towers; +₹91,954 at 600	Month 1 on
Raise yield 20% (fewer, bigger plants per tower; fans; season varieties)	+₹37,084 a month at 200 towers	Month 2 on
Grow the right crops	Lollo Rosso, green oakleaf, mini romaine, arugula 10-15%, some basil and kale. Not palak, methi, coriander, mint, strawberries	Now
Fix water	Borewell (KGWA permit) or Cauvery, plus roof rainwater: saves about ₹22,000 a month at 200 towers, ₹73,000 at 600	Jan-Mar 2027
Right power set-up	BESCOM LT-5 'Green House' (about ₹6.1/unit), not LT-3 (about ₹8.8). Block pumps save about ₹30,000 a month at 600 towers	Before building
Cut build cost	Kits at ₹5,000-7,000, not ₹10,000. Test 2-5 samples first. IS 4985 PVC DIY towers at about ₹6,900 installed	Before buying
Quick cash	Microgreens at 100 trays a week: +₹16,500-24,500 a month. Trading greens: +₹7,600 a month by month 3, about ₹30,000 by month 12	October 2026
Fund growth cheaply	AIF loan after 2-3 profitable cycles. A 2-year moratorium means about ₹20,000 a month interest on ₹40.6 lakh	Jan-Mar 2027
Keep it legal and safe	Caretaker lives on site with CCTV alarms, in place of a ₹61,000-75,000 legal night guard. Keep a 6-month reserve. Build only on owned land	Now

Your plan with your costs

Base case	200 towers	600 towers	6,000 towers
Money to build	₹50.9 lakh	₹1.49 crore	₹12.8 crore
Running cost a month (your figures)	₹88,460	₹96,830	₹9.1 lakh (your figures ×10)
Harvest a month	968 kg	2,783 kg	33,297 kg
Share sold at a good price	85%	62%	5%
Profit a month, your costs	+₹51,884	+₹1,76,928	-₹20.5 lakh
Profit per 40 days, your costs	+₹68,268	+₹2,32,800	-₹26.9 lakh
After your ₹40,000 payment (to Aug 2027)	+₹11,884	+₹1,36,928	-₹20.9 lakh
Your costs, but real tanker water and power	+₹17,875	+₹37,445	-
Profit a month, research costs	-₹1,29,460	-₹2,90,158	-₹55.9 lakh
Loan needed → EMI (6%, 6 years)	₹40.6 lakh → ₹67,330	₹1.39 crore → ₹2,30,539	Not bankable

Range from bad to good prices and seasons, your costs: 200 towers -₹49,264 to +₹1,95,200 a month; 600 towers -₹62,450 to +₹5,04,319. Above 600 towers your figures are scaled per 600-tower unit (an assumption). Above about 270 towers, ₹40,000 of helpers is not enough people to do the work.

Where your costs hold, and where they break

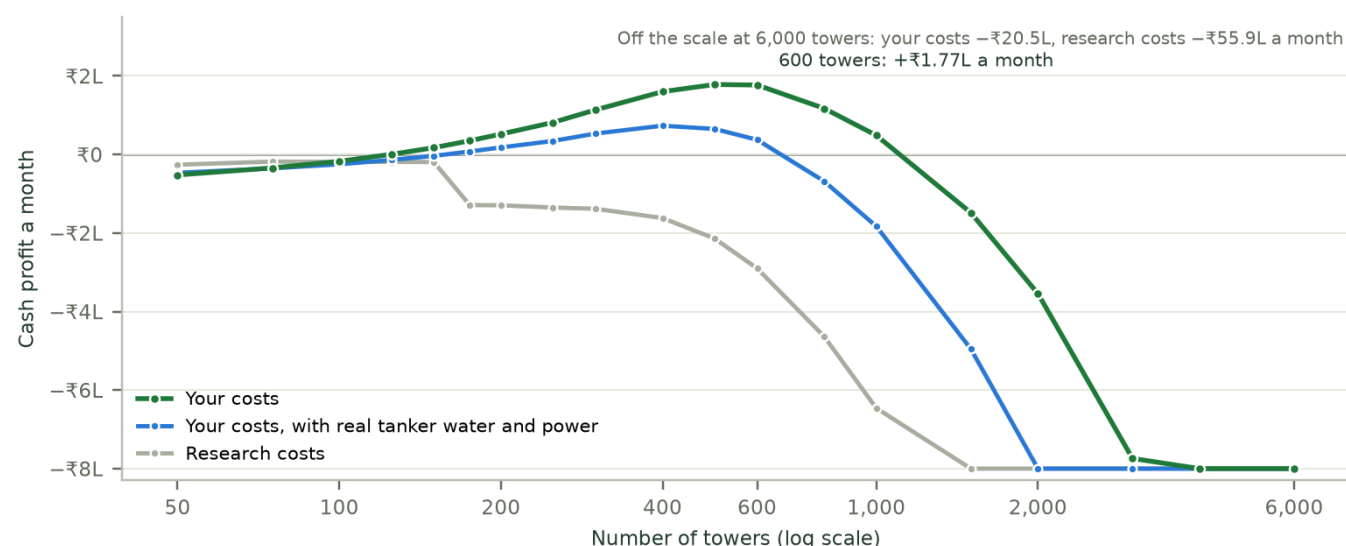

Your figure	Holds up to	Research says
Caretaker ₹15,000	Yes	Farm minimum wage ₹14,299 for 6 days a week. Live-in 7-day work costs ₹18,700–26,600. A ₹20,350 minimum is in court
Helpers ₹40,000	About 190–270 towers	600 towers need about 8 helpers; 6,000 towers need about 82
Grower ₹0 (you)	About 150–200 towers	You must be on site every day, and you also sell and deliver
Night guard ₹10,000	Below the legal wage	A legal 12-hour guard costs ₹61,000–75,000. Use the resident caretaker plus alarms and CCTV
Power ₹10,000	About 85 towers	200 towers about ₹23,000; 600 about ₹67,000 (about ₹6.1 a unit). Free farm-pump power is not legal for towers
Water ₹10,000	About 70 towers (tankers)	200 towers about ₹31,000; 600 about ₹92,000. RO throws away about half the water you buy
Repairs ₹0	Year 1 only	Pumps last about 2 years (about 300 a year at 600 towers). Polyhouse film lasts about 3 years
Insurance ₹0	Your risk	One storm or theft can cost lakhs
Accounting, marketing ₹0 (AI)	Mostly	Still pay the FSSAI licence (₹7,500 a year), a CA sign-off, sample produce and sales-visit fuel

Can 200 towers become 6,000 in 6 months?

No. Money breaks first: even 200 towers need 2.5 times your cash. Above about 420 towers the harvest is more than buyers take at good prices. At 6,000 towers, land, power, water and staff all break as well.

What it needs	200 towers	600 towers	6,000 towers	What you have
Money to build	₹50.9 lakh	₹1.49 crore	₹12.8 crore	₹20 lakh (₹4.4 lakh already committed)
Covered area	380 m ²	1,140 m ²	11,400 m ²	4,047 m ² owned (about 2,100 towers)
Power connection	13 kW	31 kW	276 kW (high-voltage rules above 50 kW)	None yet; 15–90+ days to connect
Workers	about 3	about 8	about 82	₹40,000 pays about 3 helpers
Tanker loads (12,000 L)	0.6 a day	1.9 a day	19 a day	Tankers only
Harvest a month	1.0 t	2.8 t	33 t	Buyers for about 1.7 t a month at good prices by month 12

Cash profit a month by farm size

Base case. Profit rises to about 600 towers with your costs, then falls: buyers cannot take the extra harvest. With research costs it never turns positive. Below about 70 towers you would not need ₹40,000 of helpers; the caretaker and you can do the work.

The fastest realistic path

When	What	Money	Go to the next step when
Oct-Dec 2026	10-30 test towers on your owned 60-cent plot. Microgreens up to 100 trays a week. Trade greens from partner farms through Floruvi. Caretaker lives on site	Own cash, about ₹10-13 lakh	Heads 80 g or more; 70%+ sold at good prices for 4 weeks; 10+ paying restaurants
Jan-Mar 2027	AIF loan application. BESCOM LT-5 connection. Water: borewell permit or Cauvery	Fees only	Loan approved; water secured
Apr-Sep 2027	Grow to 150-200 towers as sales pass about 210-250 kg a week	₹40-51 lakh, mostly the loan	12 months of profit
2028	300-600 towers	Up to about ₹1.5 crore	Buyers take 400-545 kg a week at good prices
Later	6,000 towers is a different business	About ₹13 crore from investors or banks	Signed bulk contracts in several cities; 3+ acres with water; high-voltage power; about 80 staff

Which crop earns the most

#	Crop	₹ per tower a month	₹ per tower per 40 days	Towers buyers take	Fit
1	Arugula (rocket)	₹1,246	₹1,640	27	good
2	Lollo Rosso lettuce	₹845	₹1,112	82	good
3	Mini romaine (Little Gem type)	₹715	₹941	73	good
4	Green oakleaf lettuce	₹679	₹894	85	good
5	Butterhead lettuce	₹645	₹849	56	fair
6	Batavia (summer crisp) lettuce	₹626	₹824	50	good
7	Italian (Genovese) basil	₹450	₹592	97	good
8	Pak choi (bok choy)	₹403	₹530	33	good
9	Swiss chard	₹366	₹482	11	good
10	Curly kale	₹357	₹470	96	fair
11	Thai basil	₹331	₹436	22	good
12	Flat-leaf parsley	₹148	₹195	24	good
13	English / baby spinach (Nov-Feb only)	₹65	₹85	37	poor
14	Mint	₹6	₹8	25	good
15	Palak (Indian spinach)	₹0	₹0	45	good
16	Coriander	–₹45	–₹59	44	fair
17	Strawberries (plant Oct-Nov, pick Dec-Apr)	–₹63	–₹83	10	fair

Per 90-site tower at steady state, after seeds, media, nutrients, packing, delivery, commissions and unsold produce, before staff, power and water. “Towers buyers take” = towers of that crop alone that Bengaluru buyers take from a new seller by month 12. Season: November–February all lettuces, kale, pak choi, arugula; March–May switch lettuce to Batavia and basil; June–October mildew-resistant lettuce, kale and chard.

What it costs to build (base, GST included)

Item	200 towers	600 towers
Towers, freight, assembly, spares	₹25,54,000	₹76,62,000
Polyhouse, fans, foggers, site work	₹5,97,900	₹16,19,700
Water: RO plant and tanks	₹3,58,419	₹10,51,923
Power: wiring, safety, backup, connection	₹4,55,129	₹13,73,421
Security: CCTV and fence	₹1,44,100	₹2,56,200
Post-harvest: cold storage and packing	₹1,02,000	₹7,81,000
People: welfare and caretaker room	₹1,84,000	₹2,34,000
Nursery, meters, registrations, marketing, first stock	₹2,35,800	₹5,63,400
Contingency (10%)	₹4,60,563	₹13,47,968
Total	₹50,91,910	₹1,48,89,612

Your ₹5,000–12,000 quote buys only the tower kit. Installed, one tower costs about ₹14,700 before the polyhouse. No subsidy is counted: MIDH and NHB pay only after approval before building and an inspection after it.

Every pain point, most serious first

Area	Pain point	Evidence
Selling	Buyers take far less than towers make	400 kg a week at good prices by month 12, against about 640 kg a week from 600 towers
Selling	Cheap, strong competitors	Hyperpure lettuce ₹140–216/kg, basil ₹150/kg; BigBasket 24 hydroponic lettuces at ₹47–85 a head
Selling	Floruvi list prices are too high for volume	1.4–8.6 times Bengaluru shop prices
Selling	Late payment	Restaurants pay in 15–60 days; Greenikk shut after ₹6 crore of unpaid bills
Selling	Big players failed	Deep Rooted lost ₹52 crore on ₹34 crore revenue (shut March 2025); Bowery, AeroFarms, AppHarvest
Money	Capital gap	200 towers ₹50.9 lakh against ₹20 lakh
Money	Loan payment larger than profit	EMI ₹67,330 against ₹51,884 profit at 200 towers
Money	No subsidy in 3 months	Approval needed before building; NHB now 35% and needs more than 4,000 m ² and a 10-year title
Money	Family land at risk	Outside AIF, banks may ask to mortgage your owned land
Money	Input GST is a cost	5–18% GST on inputs cannot be claimed back, because fresh greens are GST-free
Growing	Small heads	80–100 g a head in 90-site towers; vendor claims of 100–200 g are 1.5–3 times the research
Growing	Early losses	20–35% of plants in the first cycles
Growing	Heat and root rot	Lettuce –40% in March–May; one root-rot outbreak can kill a whole shared tank
Growing	Basil disease	Downy mildew risk from June to November
Power	Pump stops kill crops	Roots dry in 30–60 minutes; farm feeders give about 7 hours a day; backup power is a must
Power	Free farm power is not allowed	Using IP-set power for towers brings re-billing and penalties
Water	Tanker water is fragile and costly	₹2,000–2,850 a load in 2024; RO wastes half; towers hold only about 5 days of water
Labour	₹10,000 night guard is below the legal wage	A legal 12-hour guard costs ₹61,000–75,000
Labour	Minimum wage may rise 42%	₹14,299 to ₹20,350 a month if the court upholds the new notification
Labour	One owner cannot do everything	Daily checks, growing, selling, delivery and collections
Equipment	Pumps fail	About 2-year life: about 300 new pumps a year at 600 towers
Equipment	Weak kits and scams	Plastic without UV protection can lose 70% of its strength in a year; avoid buy-back schemes
Delivery	Delivery eats the margin	One drop from the city edge costs ₹170–400; the ₹99 fee needs routes of 15+ drops
Delivery	Short shelf life	Greens wilt in 2–4 days without a cold room
Land	The 1-year free plot is a trap	Anything built there is lost when the free year ends
Tax	Tax treatment	Tower produce income may be taxed as business income, not farm income
Export	Slow and thin	First paid shipment about 75 days away; basil –₹150 to +₹150/kg against selling in Bengaluru
Time	No tower cash by December 2026	Delivery and installation take 6–10 weeks; the first lettuce sale comes about 48 days after sowing
You	Stress and rushed decisions	A day-and-night system, debt and family hopes. Grow in steps and keep a reserve

Research used

Sixteen research agents read 583 sources on 29 September 2026: government orders, supplier listings, retailer pages, research papers and news. The key findings and main documents are below; every source link is in the appendix.

Topic	Key findings	Most-cited websites
Towers	Kit ₹9,500–13,500 plus GST; installed about ₹14,000 a tower; about 1.9 m ² per tower; pumps last about 2 years.	indiamart.com, dir.indiamart.com, greenwarrior.in, phooldaan.com
Polyhouse	Naturally ventilated polyhouse about ₹1,150/m ² ; shade-net houses let the monsoon rain in; film lasts about 3 years.	dir.indiamart.com, indiamart.com, horticulturedir.karnataka.gov.in, nhb.gov.in
Climate	November–February best; March–May lettuce –40%; June–October basil –30%; plan about 25% losses in the first 6 months.	en.wikipedia.org, uasbangalore.edu.in, pmc.ncbi.nlm.nih.gov, exportersindia.com
Power	LT-5 ‘Green House’ about ₹6.1 a unit all-in; LT-3 about ₹8.8; 600 towers about 10,000–11,500 units a month.	kerc.karnataka.gov.in, dir.indiamart.com, luminousindia.com, hrecs.co.in
Water	0.21 L per plant a day; groundwater is salty, so RO is needed and wastes about half; tankers about ₹92,000 a month at 600 towers.	deccanherald.com, dir.indiamart.com, thedailyjagran.com, cgwb.gov.in
Supplies	About ₹3.6 per lettuce plant per 40 days; mixing your own nutrients costs ₹170 per 1,000 L against ₹2,250 for hobby kits.	agriplexindia.com, tradeindia.com, flipkart.com, desikheti.com
Labour and security	Farm minimum wage ₹14,299 (₹20,350 in court); 38 hours per 1,000 plants per crop; CCTV about ₹83,000 for 8 cameras.	industrybuying.com, karmikaspandana.karnataka.gov.in, apna.co, esic.gov.in
Lettuce	80–100 g a head in 90-site towers; Lollo Rosso and green oakleaf first, arugula on 10–15%; Batavia in March–May.	hyperpure.com, pmc.ncbi.nlm.nih.gov, en.wikipedia.org, indiamart.com
Herbs	30–50 g per plant per 40 days; restaurants pay ₹150/kg for basil; premium shops ₹750/kg in small amounts.	doi.org, hyperpure.com, trikaya.net, blr.onlyhydroponics.in
Other greens	Kale ₹144/kg and bok choy ₹136/kg at Hyperpure; palak, methi and amaranth lose money in towers.	bigbasket.com, johnnyseeds.com, hyperpure.com, kisandeals.com
Strawberries and microgreens	Microgreens are the only 30-day cash option; break-even about ₹700/kg; strawberries weak (about 150 g a plant).	tradeindia.com, doi.org, bigbasket.com, nayagreens.com
Prices	Hyperpure lettuce ₹140–216/kg; bulk ₹35–65/kg; BigBasket hydroponic heads ₹375–525/kg.	tradeindia.com, hyperpure.com, bigbasket.com, blr.onlyhydroponics.in
Demand and competition	New-seller demand 26 → 95 → 210 → 400 kg a week (months 1, 3, 6, 12); Deep Rooted’s failure shows the risk.	exportersindia.com, entrackr.com, hyperpure.com, bigbasket.com
Packing and delivery	Delivery costs more than packaging; an EV three-wheeler serves restaurants at ₹6–28/kg; cold room ₹1.8–3.8 lakh.	tradeindia.com, borzodelivery.com, porter.in, trucks.cardekho.com
Export	Legal within 90 days; first shipment about 75 days away; only basil pilots of 50–100 kg with advance payment.	comtradeapi.un.org, apeda.gov.in, ppqs.gov.in, main.ecgc.in
Finance, law and risk	No subsidy pays in 3 months; AIF about 6%; NHB 35% and more than 4,000 m ² ; tower income may be business income.	horticulturedir.karnataka.gov.in, agriinfra.dac.gov.in, sbi.bank.in, nhb.gov.in
